

TRAFFIC LIGHT PUSH BUTTON

What is a Push Button?

Push buttons are installed at traffic lights with a dedicated pedestrian signal, and are used to bring up the pedestrian "walk" indication in locations where they function correctly. Push buttons do provide confirmation feedback and pedestrians are more likely to wait for the "walk" indications before passing thru the road.

The push buttons not only meet the needs of road users, they can also be adapted to suit the individual requirements of intersections in a city. They help pedestrians, cyclists and people with visual impairments to cross light-controlled road crossings safely.

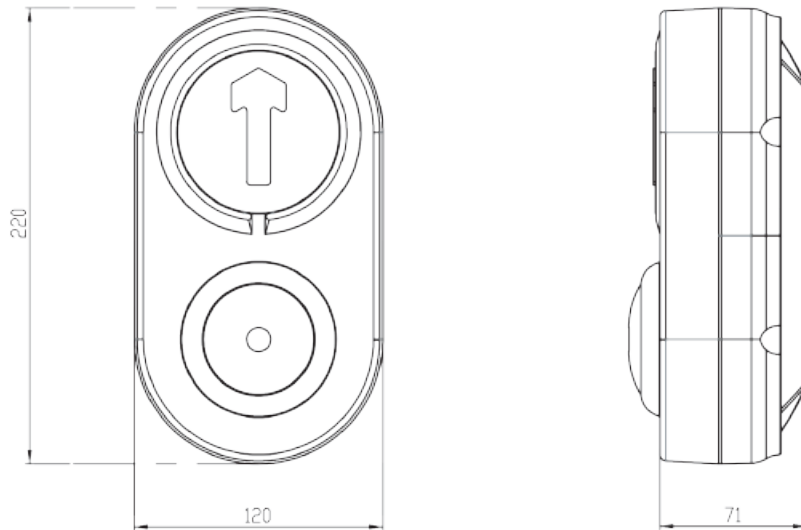

Product Specification

Part No :	AvL-PB-Red Man-G5 / AvL-PB-Green Arrow-G5
Power (W) :	3W
Control :	From Controller / Push Button
Symbol :	Redman / Green Arrow
IP Rating :	IP 65
Materials :	Aluminium Die Cast
Weight :	1KG
Finishing Color :	Black
Operating Temp. (°C) :	-20 °C ~ 50 °C
Working Humidity (% RH) :	10 ~ 90
Storage Temp. (°C) :	10 °C - 65 °C
Lifespan :	5 Years
Warranty :	2 Years

Dimension
